

HOT TOPICS in Stormwater Management!

Free LIVE webcasts packed with information and resources for watershed practitioners and policy makers!

Produced by the Center for Watershed Protection and purchased by the Stormwater Coalition of Albany County as part of their Public Education and Outreach Program, engineers, landscape architects, planners, planning/ZBA board members, and interested citizens are invited to attend! Join us for this shared learning opportunity!

Limited space, call or e-mail to reserve a seat!

For more information about the Center for Watershed Protection or these webcasts, go to www.cwp.org/our-work/training/webcasts

Website Viewing Locations

CDRPC: Capital District Regional Planning Commission; One Park Place; Suite 102; Albany, NY (off of Wolf Rd)
COOP EXT: Cornell Cooperative Extension, 24 Martin Rd, Voorheesville, NY

Wednesday, March 16, 2011 from 12pm-2pm. Location: CDRPC

Design, Installation & Maintenance of Constructed Wetlands & Regenerative Stormwater

Learn how to boost the performance of constructed wetland designs, and what research is telling us about runoff reduction and pollutant removal rates. You will also be introduced to "regenerative stormwater conveyance," an innovative approach to convey and treat runoff and restore habitats, originally developed as an alternative outfall design for coastal plain sites.

Wednesday May 18, 2011 from 12pm-2pm. Location: CDRPC

Ultra-Urban Stormwater Design and Retrofitting

Watershed professionals face many unique challenges when integrating effective stormwater management into our urban landscapes, streetscapes, and other elements of the built environment. This webcast will profile innovative forms of urban bioretention and other BMPs, and will also address setting an appropriate mitigation or offset fee for sites where full compliance is not possible.

Wednesday July 13, 2011 from 12pm-2pm. Location: Cornell Cooperative Extension

The Top Actions that Local Governments can take to address Numerical Goals, such as TMDLs & WIPs

This webcast will present CWP's list of top performing (and often overlooked and underappreciated) management practices. We will help you quantify the benefits of practices such as urban watershed forestry, urban nutrient management, illicit discharge detection and elimination, and large and small retrofits.

Wednesday September 14, 2011 from 12pm-2pm. Location: Cornell Cooperative Extension

Rainwater Harvesting as a Stormwater Management Practice

Rainwater Harvesting is a multi-tasking BMP - however its use for stormwater management is not yet widespread, and there have been questions about how to credit volume and pollutant reductions from the practice. This webcast will address different storage and reuse configurations and some quantitative methods to account for stormwater benefits. Several case studies will be presented.

Wednesday November 16, 2011 from 12pm-2pm. Location: Cornell Cooperative Extension

Stream Restoration

Stream Restoration is a multibillion dollar industry worldwide. In fact, the explosion of stream restoration as a watershed management practice has helped create another series of questions regarding the effectiveness of stream restoration in meeting overall watershed and project-specific goals. This webcast will get to the root of the issue and present different points of view from academia, watershed managers and stream restoration practitioners.

To attend a webcast, contact the swcoalition@albanycounty.com or 447-5645

Special thanks to CDRPC and Cornell Cooperative Extension for the use of their facilities.
